Tests 11.2-11.6.*	Requirements for application	If this is twe	Then we conclude
limit test	Any an	lim an ≠0	Ean diverges
divergence		lin an =0	inconclusive
geo, series	an = rh	r  < 1	$\sum_{n=1}^{\infty} (r)^n \text{ converges}$ to $\frac{r}{1-r}$
		Irl≥1	Si(r)" diverges
p-seriez	$a_n = \frac{1}{n^p}$		San converges
		p ≤ 1	San diverges
integral test	an = f(n); f(x) >0, confinuous and decreasing on [1,00)	$\int_{1}^{\infty} f(x) dx = converges$	San converges
		∫, fxidx diverges	San diverges
comparison test	lan >0 known bn >0	an & bn 28 bn converges	San converges
		an > bn & Ebn diverger	E'an diverges
limit comparison test	an >0 Known bn >0	$\lim_{n\to\infty} \frac{a_n}{b_n} = L, 0 < L < \infty$ and $\Sigma b_n$ converges	∑an converges
	·	$\lim_{n\to\infty} \frac{a_n}{b_n} = L,  0 < L < \infty$ and $\Sigma$ by diverges	2 an diverger
		lim an = 0 or 00, or DNE	in con clusive
alternating series	an >0 an+1 ≤an	lim an = 0 n→∞	∑'(-1) <sup>n</sup> an converge
*		other wise	inconcluive
absolute convergence	Any an	∑  an  converges	San converges
		∑ lanl diverger	inconclusive
combinations	Any an, bn, CEIR	Ean converges and Ebn converges	E (can + dbn) converges
